

GRANITE WORKS

Yard over

[www.graniteworks.com.au](http://www.graniteworks.com.au)

A beautifully designed and handcrafted wood fired pizza and tandoori oven sculptured from pottery and concrete to produce gourmet cuisine. The Yard Oven is: innovative in design; aesthetically beautiful; user friendly and safe; time and energy efficient; and space saving.

The Yard Oven is designed, handcrafted and finished in earthy textures in accordance with its registered design. Visually architectural, it is sculptured to resemble a piece of garden art.

The oven is easy and safe to use with the sleek vertical shape and doubleskin design allowing simple fire ignition and drawing, excellent internal heat retention with external touch coolness.

These innovative features ensure the oven is both time and energy efficient reducing heating time to approximately half an hour and using a fraction of the wood required by other outdoor ovens.

The Yard Oven is ideal for small exterior areas having dimensions of only 800mm diameter x 1m high. The beautifully designed form allows prominent positioning as a striking feature for external spaces.
